Buenos Aires, Argentina.

PROFILE

I am a proactive, organized, and results-oriented programmer with 1 year of freelance experience in the development of web projects and custom applications.

During this time, I gained solid skills in self-management, clear client communication, and adaptability to different environments and requirements.

I stand out for my ability to work in remote teams, solve problems efficiently, and create scalable and effective solutions.

WORK EXPERIENCE

Freelance Programmer

Remote — Aug 2024 – Present

- Development of web applications and landing pages using JavaScript (ES6+) and React, with animations powered by Framer Motion.
- Back-end implementation with Node.js and Express, connecting forms to REST APIs and Google Sheets via Apps Script.
- Database creation and management with MySQL and Firebase.
- Advanced customization of Tienda Nube e-commerce websites, working via FTP with the server, applying modifications in JavaScript, CSS, and Node.js.
- Development of responsive and interactive projects, including video integration and animations to enhance user experience.
- Full project lifecycle management: client communication, requirements analysis, planning, development, and support.
