EDUCATION

Bachelor's in Audiovisual Design

Universidad de Palermo
Mar 2019 - Mar 2023

Diploma in Full Stack Development

UTN (Univ. Tecnologica Nacional)
Mar 2022 - Mar 2023

CURRENT FOCUS

- > AI agent orchestration
- > LLM system design
- > RAG pipelines
- > Multi-app automation (n8n)
- > Model Context Protocol
- > Frontend performance
- > Testing & evaluation
- > Web3 & Blockchain

LANGUAGES

Spanish (Native)
English (Advanced)

INTERESTS

Algorithmic music (Strudel live coding), Blockchain & DeFi, Creative coding, Open-source

Felipe Cremerius

FULL-STACK / AI ENGINEER

Full-Stack Engineer with hands-on experience building AI-native applications, LLM-driven automation systems, and intelligent workflow orchestration. Skilled in designing agent-based architectures using MCP and multi-provider LLM integrations. Strong product intuition with a track record of shipping end-to-end solutions from system design and backend services to responsive, high-signal React interfaces.

EXPERIENCE

Full-Stack / AI Engineer

2025 - Present

Reino Ceramicos - Buenos Aires, Argentina

- > Designed and built AI-driven internal dashboards integrating LLM-powered data analysis, automated report generation, and intelligent workflow suggestions used daily by multiple business areas
- > Implemented agent-based automation pipelines using MCP and Claude Code to orchestrate cross-system workflows between Slack, internal tools, and databases
- > Built real-time operational monitoring systems using Socket.io with automated alerting and fallback mechanisms ensuring reliable, auditable execution
- > Developed end-to-end full-stack features: React frontend with Zustand state management, NestJS backend services, and MySQL data layer
- > Architected modular, scalable codebases using screaming architecture patterns, enabling rapid iteration across AI-driven and traditional features
- > Integrated multi-provider LLM capabilities for data visualization and business intelligence using ECharts and Recharts

Freelance Full-Stack Developer & AI Automation

2022 - 2024

Independent - Buenos Aires, Argentina

- > Built intelligent automation workflows integrating REST APIs, Google Apps Script, and n8n to orchestrate multi-app business processes across CRMs, email, and internal systems
- > Developed responsive web applications with React, integrating AI-assisted features and LLM-powered content generation for client platforms
- > Customized e-commerce platforms via FTP using Liquid templating with automated inventory and notification systems
- > Created corporate training platforms with end-to-end ownership from architecture and backend design to frontend UX with SEO optimization and performance tuning

LLM APIs

TECH STACK

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend & APIs: Node.js (NestJS), REST APIs, MySQL, Socket.io, Google Apps Script, Python

AI & LLM: MCP, Claude Code, LangChain, Multi-provider LLM integration, RAG systems, Prompt engineering, n8n

Architecture: Agent-based systems, Screaming Architecture, Modular Architecture, Event-driven patterns

Testing: Playwright, Jest, Vitest, E2E testing, Regression testing, LLM evaluation frameworks

State & Data: Zustand, TanStack Query, Axios, JSON data modeling

Web3: Solidity, ethers.js, wagmi, ERC20 tokens, wallet integration, Sepolia testnet

PROJECTS

OnChainApp - ERC20 Token Manager & Crypto Dashboard

Full-stack crypto dashboard with React, TypeScript, and wagmi. Live market data, memecoin tracking, on-chain transfers on Sepolia.
github.com/fcreme/OnChainApp

CLI - Development Workflow Automation

CLI tool in Go for automating dev workflows, AI-assisted code generation, and project repo management from the terminal.
github.com/fcreme/CLI

Three.js Low-Poly 3D Environment

Stylized 3D world with custom geometry, lighting, and real-time browser rendering using Three.js and WebGL.
github.com/fcreme/ThreeJS-LowPoly-Project

Tide Active - Corporate Training Platform

End-to-end corporate platform with modern design, animations, responsive layout, and integrated content management.
github.com/fcreme/tideactive-personal-brand
